

G C C C A T C A G A

The image displays a sequence of ten nucleotide bases: G, C, C, C, A, T, C, A, G, A. Each base is rendered in a distinct color: G is yellow, C is blue, A is green, and T is red. Below each letter, there are horizontal bars and lines in various colors (red, green, blue, yellow) that appear to be part of a larger diagram or data visualization, possibly representing a DNA sequence or a specific motif.
