**How do you think the I-FOCUS-CS tutoring system should be implemented or improved to help you more?**

I think tutoring group sessions would be helpful where we go over difficult topics

I think the tutoring is fine, I just have not done a good job of using it this semester being so busy with classes.

For Keegan, I don't feel very incline to visit him since he does not seem approachable to me. He's not bad by any means but I would like tutors to be more encouraging to meet with them and seeking to help out students and I feel he's lacking that.

Q19 - Are you taking any other CS or MATH course (other than 1083, 1713, or 2123) ?

Q9 - You said you are taking other CS or MATH courses please enter the code (e.g., CS 3333) and your midterm grades A+,A, A-,+B, B etc or score out of 100.

More Tutors for AI :<

I need to work on asking for help when I realize that I do not understand the concepts presented in class.

offer group sessions where we are able to ask questions and learn from each other

I just need to do better studying for tests and using tutoring and outside resources to get better.

One main complaint is I do not know exactly who to ask for help when I am at the main lab. If there were designated spots to know exactly where to ask help then that would be great. I just can't tell since it looks like they are just chatting with each other and they seem a bit annoyed when you ask them for help so it's intimidating to ask at times.
