

# CS 7123 Research Seminar

**Due Date: check learn.utsa.edu**

**Assignment 4: The problem: the Heart of the Research Process... (similar to Ch 2 in the optional textbook)**

A designated student will read chapter 2 from the book and make a presentation in class. The others do not need to read that chapter from the textbook. Instead they will search and find similar materials to Ch2 (The problem: the Heart of the Research Process, particularly in CS) through the web and study them, then **write an essay/paper on how to find research topics, how to state a problem, etc in CS** (at least two page).

To get some initial ideas you can look at the Ch 2 slides from the class web page <http://www.cs.utsa.edu/~korkmaz/teaching/cs7123> (follow "book's slides ..." links under online materials). and r02a (how to find research topics, how to state a problem, etc.).

Also, as an example paper, start with r02a.... that is available in the class web page <http://www.cs.utsa.edu/~korkmaz/teaching/cs7123> under the "papers to read" link;

**Please name your finally submitted file as**

**Lastname-Firstname-04.pdf**
