CS 7123 Research Seminar

Due Date: check learn.utsa.edu

Assignment 5: Review of the Related Literature (similar to Ch 3 in the optional textbook)

A designated student will read chapter 3 from the book and make a presentation in class. The others do not need to read that chapter from the textbook. Instead they will search and find similar materials to Ch3 (Review of the Related Literature, particularly in CS) through the web and study them, then **write an essay/paper on how to review literature and how to read papers in CS** (at least two page).

To get some initial ideas you can look at the Ch 3 slides from the class web page http://www.cs.utsa.edu/~korkmaz/teaching/cs7123 (follow "book's slides ..." links under online materials). and r02a (how to find research topics, how to state a problem, etc.).

Specifically look for papers discussing "how to read papers" (computer science, engineering, science). Here are some example links:

> http://www2.cs.uregina.ca/~pwlfong/CS499/reading-paper.pdf
