For this assignment, you will complete your reading assignment, listed on the last slide of Lecture 01, and read the following two articles on extreme programming and agile development method.

You will write a synopsis in your own words on agile development method and extreme programming. In particular, you need to address the following questions.

- What are the characteristics of extreme programming?
- What types of software systems could be a good fit of extreme programming to develop?
- How agile development method is different from Waterfall model?
- How agile development method is different from Incremental model?
- How agile development method is different from Prototype model?

Deliverables

You will work individually and write a three-page summary on agile development method and extreme programming using your own words. Format your summary using single column, 12-point Times New Roman, single-spaced lines, and 1-inch margins all around.

Due Date

Please hand in your printed copy of summary in class on Thursday Jan. 30, 2014.
